Solon Blocks Action on College Discipline Plan

By HENRY C. MacARTHUR
Capitol News Service

SACRAMENTO — Because of technical rules, the state assembly has balked, at least temporarily, from consideration of one of the most pressing matters confronting the public at the present time.

This is action to restore discipline on state college and university campuses, which is demanded in a resolution before the assembly rules committee authored by Assemblyman Ray E. Johnson, (R-Chico).

The Johnson resolution would direct regents of the university and state college trustees to expel any student guilty of disrupting classes.

WHEN THE resolution was brought up before the assembly rules committee, which clears all resolutions before they go to the floor of the assembly for a vote of the 80 members, consent was withheld by Assemblyman Johnson (D-San Francisco).

Under committee rules, the withholding of consent by a single member prevents a matter from being brought before the house. Thus, Burton's objection to taking strong steps to strengthen procedures for keeping order in the state's public institutions of higher learning went down the drain for the time being.

Johnson charged in his resolution that irresponsible students are preventing serious-minded students from pursuing their education by criminal acts.

Johnson charged in his resolution that irresponsible students are preventing serious-minded students from pursuing their education by criminal acts.

JOHNSON, who represents Butte, Colusa, Glenn, Lake, Sutter and Yolo Counties, has two large campuses in his district, Chico state college and the University of California at Davis.

While there has been no student rioting on these two campuses, the Butte county legislator nevertheless is

deeply concerned over the lack of forceful discipline in other state institutions, such as San Francisco state college, and the University of California at Berkeley campus.

He considers that the situation is a matter for legislative action, stating:

"The people of our state are shocked at the violence, wanton destruction, and disregard for law and order which have torn our campuses.

"MOST OF the problem has been caused by irresponsible students who themselves are contemptuous of the privilege of receiving a higher education. Their actions and their interference with other students must not be tolerated."

It appears somewhat peculiar that a legislator from a community in which a good part of the violence has taken place would thwart an action designed to provide corrective measures. Burton, however, is of ultra-liberal philosophy, and his action in blocking the resolution would appear to condone a departure from the orderly processes of education, as well as a disregard for law and order.

JOHNSON says the legislature is responsible for providing public supported educational facilities, and therefore, it should be equally responsible for seeing that the facilities are properly used.

But unfortunately, the technical processes of legislation provide that one legislator can withhold consent and thereby prevent even a discussion of a subject by the entire house.

Teenager's Artistic Work Is Rewarded

Paul Chaffey, 15503 Gramercy Place, Gardena, has been awarded a commemorative plaque in recognition of art work he created for Ascension Lutheran Church and Christian Day School, 17910 S. Prairie Ave.

Arlen Ahlers, principal of the day school, presented the award.

Chaffey is one of 19 teenagers from Ascension who attend Walter A. Maier Lutheran High School in Los Angeles.

"THE SOUND" IS ELECTRIC

We'll have to take part of the credit... or blame... for modern music. The beat. The sound. Electric guitars, electric banjos, electric organs, electric amplifiers. Who knows, maybe even electric kazooos.

We're not necessarily endorsing the present trend. We're just pointing out that none of it could have happened without our product.

There wouldn't be any hi-fi stereos, or radios, or TV to bring you music, either. But because of electricity, you can tune in the whole world. Music, entertainment, sports, news, everything.

What's it cost you? So little you probably don't even think about it. Fractions of a penny to play a record or watch a television show. Only electricity can do so much for so little.
